

Indoor Flying

Indoor flying is now in full swing on Friday nights. All club members are welcome.

The school hall at Villiers NCR is kindly organised by Leslie at no cost to flyers on the night. Tea and coffee (sometimes even biscuits!) are provided.

The availability of this facility ensures that flyers are practically guaranteed some *stick-time* regardless of the winter weather.

A wide variety of kits suitable for indoor use are available and the incremental cost of getting involved is reasonable. These kits are generally of foam construction and take a lot of abuse!

Currently there are about eight to ten active indoor-flyers so there is room for more bodies. At the very least this will help to increase the crash ratio!
