

Autumn Control Line Event

Saturday 17th September saw the instigation of the first Autumn Control-Line event at SMFC.

Although not as strong as the regular Spring event, this first Autumn outing attracted a good showing of *control-liners*.

The weather was benign on the day and a good days flying was had by all participants.

Many thanks to Dermot for organising the event and to William Senior for having the runway in tip top condition. Hopefully this will become a regular event in the Control-Line calendar.

This is why you should not taxi back towards the pitts!!!
